Generate IRN	https://uat-api.logitax.in/einvext/v1/GenerateJSONEInvoice

PRODUCTION	URL
Generate IRN	https://app.logitax.in/EInvoiceWebApi/GenerateJSONEInvoice- (Truncated)
Generate IRN	https://api.logitax.in/einvext/v1/GenerateJSONEInvoice

GOVERNMENT API Vs LOGITAX API LIST

Government APIs	Government APIs	Logitax Premium API	Differentiators
Authentication	Yes	Not required	1. Auth Token is managed by Logitax.
Generate IRN	Yes	Yes	1. Handles the inconsistent data types 2. Give IRN details even after IRN generation [Acts like 'Get IRN'] 3. Provide additional information in Response than Government Response.
Cancel IRN	Yes	Yes	1. Give IRN No even though invoice in Inactive i.e. cancelled 2. Government Accept Request for single IRN cancellation, however LogiTax Handles multiple IRN Cancellation in one request [Bulk IRN Cancellation]
Get IRN details	Yes	Yes	1. Will provide same response as of Generate IRN and contains additional information than the Government 2. Government Accepts Request for single IRN, LogiTax Handles bulk request for multiple IRNs and returns with response for all IRNs as an Array.

Generate E-way bill by IRN	Yes	Yes	1. Handles the inconsistent data types 2. Gives EWB Details even after EWB generation. 3. Additional details for print [Url to print EWB Prints]
-----------------------------------	-----	-----	--

			4. Government accepts request for single IRN to generate E-Way Bill, LogiTax handles Multiple IRNs in one request and returns with EWB details for all IRNs in response as an array.
Get GSTIN details	Yes	No	-----
Cancel E-way Bill	Yes	Yes	1. Gov API only works on sandbox but on Production LogiTax Internally calls Cancel E-Way Bill API from E-Way Bill. 2. Government Accept Request for single EWB cancellation, however LogiTax Handles multiple EWB Cancellation in one request [Bulk EWB Cancellation]
Cancel E-Way Bill and IRN Both	No	Yes	1. LogiTax internally splits API into Cancel E-Way Bill and Cancel IRN and give a Consolidated response. 2. Logitax Handles bulk Cancellation in One Request.
Sync GSTIN details from CP	Yes	No	-----
Get e-way bill details by IRN	Yes	Yes	1. Government accepts request for single EWB, Logitax Handles multiple EWB in single Request and returns response as an array with details for all EWB.
Get IRN details by Doc Number	Yes	Yes	1. Provides response same as Generate IRN with additional information the Government. 2. Government accepts request for single Document, LogiTax Handles bulk/Multiple Document Numbers in one Request and reruns with response as an array.

GENERATE IRN USING REST API -

To access the API, application should first authenticate using the credentials shared. The API content

information is used for authentication and authorization purposes.

The format and details of generate E-INVOICE bill API request is depicted in following table:

URL	As per URL list
Content Type	Application/ JSON
Method	Post

Following details will be shared by separate email:

- 1) User Code
- 2) Password
- 3) Client Code
- 4) Template Code
- 5) Seller GSTIN (Only specific GSTIN are allowed in Sandbox or user can register their customer GSTIN on Sandbox)
- 6) Buyer GSTIN

REQUESTED JSON

We required some additional fields in API to integrate with us based on above options. These additional fields are User_code, Password, Client_code

Use Following Details:

- i. **URL:** As per URL list
- ii. **METHOD:** POST
- iii. **REQUEST JSON:** use following Request Json

REQUEST SCHEMA

SR NO.	JSON FIELD NAME	PATTERN	DESCRIPTION	MANDATORY/OPTIONAL	DATA TYPE	FIELD TYPE	SAMPLE DATA	VALIDATION
A1	user_code		User Code	Mandatory	String (Max length : 50)	Free Text	AMEYA	1) Alphanumeric, 2) -, /
A2	password		Password	Mandatory	String (Max length : 50)	Free Text	Pass@123	1) Your password must be at least 8 characters 2) Your password must contain at least one capital letter 3) Your password must contain at least one digit
A3	client_code		Client Code	Mandatory	String (Max length : 50)	Free Text	LOGIBRICKS	
A4	template_code		TEMPLATE CODE	Mandatory	String (Max length : 50)	Free Text	EINV	1) Alphanumeric 2. Applicable for Serialized JSON Option
A5	ERPTYPE		ERP Type	Optional	String (Max Length 50)	Only Selected Value	Tally	Based on this Response is handled, For Tally ERP send value = "Tally" else null or it cannot be included in JSON.
A6	Version			Mandatory	String (Min: 1, Max : 6)	Free Text	1.03	Currently 1.03
B								
B1	TaxSch	"^(GST)\$"	GST- Goods and Services Tax Scheme	Mandatory	String (Min: 3, Max : 10)	Only Selected Values	GST	Set Default value as "GST" as there is no any other value given by Government

B2	SupTyp	"(?i)^(B2B) (SEZWP) (SEZWOP) (EXPWP) (EXPWOP) (DEXP))\$"	Type of Supply	Mandatory	String(Min: 3, Max : 10)	Only Selected Values	B2B	B2B -Business to Business SEZWP - SEZ with payment SEZWOP - SEZ without payment EXPWP - Export with Payment EXPWOP - Export without payment DEXP - Direct Export
B3	RegRev	"^([Y N]{1})\$"	whether tax liability is payable under reverse charge	Optional	String(Min: 1, Max : 1)	Only Selected Values	Y	Y - the tax liability is payable under reverse charge N - the tax liability is not payable under reverse charge 'Reverse Charges' can be set as 'Y' in case of B2B invoices only
B4	EcmGstin	"^([0-9]{2}[0-9A-Z]{13})\$"	GSTIN of e-Commerce operator	Optional	String(Min: 15, Max : 15)	Text	24ABCDE1734G1Z7	1) ([0-9]{2}[0-9A-Z]{13})n 2) Normal GST Validation
B5	IgstOnIntra	"^([Y N]{1})\$"	IGST Applicability despite Supplier and Recipient Located in Same State/UT	Optional	String (Min:1, Max:1)	Text	N	To report the scenarios where the supply is chargeable to IGST despite the fact that the Supplier and Recipient are located within same State/UT
C								
C1	Type	"(?i)^(INV) (CRN) (DBN))\$"	Document Type	Mandatory	String(Min: 3, Max : 3)	Only Selected Values	INV	INV - Invoice CRN -Credit Note DBN -Debit Note
C2	No	"^[a-zA-Z1-9]{1}[a-zA-Z0-9V-]{0,15}\$"	Document Number	Mandatory	String(Min: 1, Max : 16)	Text	LTPL/123/1234	1) Alphanumeric, 2) -, / 3) Should not be starting with 0, / and -.
C3	Dt	"^[0-3][0-9][0-1][0-9]"	Document Date	Mandatory	String(Min: 10, Max : 10)	Text	05/02/2020	1) Date format - DD/MM/YYYY

		9][2][0][1-2][0-9]\$"						2. Document Date Cannot be Previous of 01/10/2020

RESPONSE SCHEMA

FIELDS	DESCRIPTION	DATA TYPE
Flag	true/false(values true-Success and false- Failure)	Varchar (10)
message	E-Invoice Generated Successfully/Error description	Varchar (500)
Status	Status of the generate IRN request(values 1-Success and 0- Failure)	integer
AckNo	Transaction number	integer
AckDt	Date and time on which invoice is registered(Date format is 'yyyy-MM-dd HH:mm:ss ').	datetime
Irn	SHA256 hash of Gstin, DocDtls.No, DocDtls.Typ, financial year of DoctDtls.Dt	Varchar (64)
SignedInvoice	Complete e-Invoice data digitally signed using JSON Web Token(JWT) and JSON Web Signature (JWS) with “SHA256RSA” algorithm	Varchar (max)
SignedQRCode	Complete QR- Code data digitally signed using JSON Web Token(JWT) and JSON Web Signature (JWS) with “SHA256RSA” algorithm	Varchar (max)
Status	‘ACT’ for Active and ‘CNL’ for Cancelled	
DcrySignedInvoice	Decrypted Signed Invoice	Varchar (2000)
DcrySignedQR Code	Decrypted Signed QR Code	Varchar (256)
EwbNo	E Way Bill No., if E Way Bill is generated	integer
EwbDt	E Way Bill Date., if E Way Bill is generated	DateTime [YYYY-MM-DD HH:MM:TT:SS]
EwbValidTill	E Way Bill validity date, if Part B details are provided in the payload	DateTime [YYYY-MM-DD HH:MM:TT:SS]
pdfUrl	URL To get E-Waybill Summary Print in PDF.	Varchar (256)
detailedpdfUrl	URL To get E-Waybill Detailed Print in PDF.	Varchar (256)

InfoDt1s	Any additional message such as, If distance is passed is 0, shows actual distance calculated for the pair of PIN codes to be conveyed would be passed.	Varchar (2000)
DocType	Document Type	Varchar(3)

VALIDATIONS

A) The following summation validations are to be done for items

- Gross Amount of Item = Quantity X Selling Unit Price
- Taxable Value of Item = Gross Amount of Item – Discount
- SGST Value of Item = Taxable Value of Item X GST Rate / 2, if intra-state
- CGST Value of Item = Taxable Value of Item X GST Rate / 2, if intra-state
- IGST Value of Item = Taxable Value of Item X GST Rate, if inter-state
- Cess Value of Item = Taxable Value of Item X Cess Rate
- State Cess Value of Item = Taxable Value of Item X State Cess Rate
- Total Value of Item = Taxable Value of Item + SGST Value of Item + CGST Value of Item + IGST Value of Item + Cess Value of Item + State Cess Value of Item + Non-Advol Cess Value of Item + State Cess Non-advol value of Item + Other charges.

(Note: Temporarily, the validation of 'Gross Amount of Item with Quantity and Selling Unit Price' has been withdrawn.)

B) The following summation validations are to be done on Invoice total

- Total Taxable Value = Taxable Value of all Items
- Total SGST Value = SGST Value of all Items
- Total CGST Value = CGST Value of all Items
- Total IGST Value = IGST Value of all Items
- Total Cess Value = Cess Value of all Items + Non-Advol Cess Value of all Items
- Total State Cess Value = State Cess Value of all Items + State Cess Nonadvol Value of all Items
- Total Invoice Value = Total Taxable Value + Total SGST Value + Total CGST Value + Total IGST Value + Total Cess Value + Total State Cess Value + Total Non-Advol Cess Value
- The round-off value for 'Round_off_amount' attribute is to adjust final 'Total_Invoice_Value_INR' attribute and can be between -99.99 and +99.99
- In case of CREDIT NOTE AND DEBIT NOTE, the 'IGST/CGST/SGST/CESS value of item' is not validated with corresponding tax rates and taxable values

Tolerance Limit Details: Tolerance limit for points A and B above: The passed value should be between minimum and maximum values as explained here. Minimum value is considered as the rupee part of the calculated value minus one rupee and maximum value is taken as the rounded up to next rupee value of the calculated value plus one rupee.

Example 1: In Point 1 and 2, if calculated value for IGST of item A is 2345.04 then tolerance limit for passed value of that item is between 2344.00 and 2347.00.

Example 2: In Point 1 and 2, if calculated value of IGST of all items is 10241.00 then tolerance limit for passed value of IGST of all items is between 10240.00 and 10242.00

C) Validations on e-waybill:

- E-waybill can be generated only if E-way Bill related details are passed.
- E-way Bill is not generated for document types of Debit Note and Credit Note and Services.
- E-way Bill cannot be generated for cancelled IRN.
- E Way Bill can be generated provided at least HSN of one item belongs to goods.
- If only Transporter –Id is provided, then only Part-A is generated.
- If mode of transportation in 'Road', then the Vehicle number and vehicle type should be passed.
- If mode of transportation in Ship, Air, Rail, then the transport document number and date should be passed. Vehicle type and vehicle number should be null or attributes should not have been passed.
- The Vehicle no. should match with specified format and exist in Vahan database.
- E-Waybill will not be generated if the seller or buyer GSTIN is blocked due to non-filing of Returns.

- PIN-PIN distance:
 - The distance of transportation is validated against the auto-calculated PIN-PIN distance stored in the system. The allowed distance for transportation should be between +/- 10 % of auto-calculated PIN-PIN distance. If the auto-calculated distance is less than 100 KMs, then the allowed distance for transportation should be between 1 and +10 % of auto-calculated PIN-PIN distance
 - If the distance of transportation is passed as 0 (zero), then the system will consider it as request made by the tax payer, to consider the auto-calculated PIN-PIN distance for the generation of e-way bill and generate the e-way bill along with IRN. The actual distance is passed in “Info. Message” column for reference.
 - If the PIN-PIN distance is not available in the system, the passed value of distance will be taken for generation of e-way bill and distance value cannot be more than 4000.
 - The actual distance has to be passed in case the source and destination PIN codes are same and the allowed range of value is from 1 to 100.
- In case of export of goods, shipping address should be passed during generation of IRN.
- In case incomplete information has been passed for generation of E Way Bill, then IRN will be generated and returned but not E Way Bill number. However subsequently, based on IRN, E Way Bill can be generated.
- While generating E Way Bill, Vehicle Type ('VehType') can be set to 'O' (Over Dimension Vehicle) if the Transportation mode ('TransMode') is set as '4' (Ship)

D) Other validations

- e-invoice (IRN) cannot be re-generated for the cancelled e-invoice (IRN) also.
- IRNs can be generated only if the Supplier GSTNs is 'Active'. IRN cannot be generated if the status of Supplier GSTNs is 'Suspended' or 'Provisional' or 'Inactive' or 'Cancelled'. However, IRN can be generated if the Recipient GSTIN is 'Active' or 'Suspended' but not 'Provisional' or 'Inactive' or 'Cancelled'
- Request for the IRN/e-Invoice can be made only by the supplier of the goods or services.
- In case the supplier is SEZ unit, then he cannot generate e-Invoice.
- **E-Commerce Transactions** - In case of e-commerce transactions, the e-Commerce Operator can request for the IRN/e-invoice on behalf of the supplier. In this case, the e-Commerce Operator should have been registered on the GST portal as e-Commerce Operator and pass EcmGSTIN accordingly.
- **Document date validation** –
 - The Document Date can be from 01-Oct-2020. IRN Requests belonging to previous dates will be rejected.
 - If the status of the Supplier GSTIN or Recipient GSTIN is 'Cancelled', the document date should be between date of registration ('DtReg') and Date of De-Registration ('DtDReg') for generation of IRN
- **Document number validation** - Supplier should ensure that the unique invoice number is being generated for the financial year for each invoice, in his ERP/manual system.
- **Reverse charge** -
 - 'Reverse Charges' can be set as 'Y' in case of B2B invoices only and tax is being paid in reverse manner as per rule. Even in case of Reverse Charged invoices, the Supplier has to generate the IRN.
 - However, in case of Reverse charge and Export transactions (EXPWP), Total value of Item can match with either with tax values or without tax values. That is, the total value of item can include or exclude the tax values as per the business requirements
- **Customer GSTIN** - Recipient GSTIN should be registered and active. In case of transaction of direct export, recipient GSTIN has to be URP and state code has to be 96, POS should be 96. In case of GSTIN of supplier or recipient belonging to state of 'OTHER TERRITORY' (with state code as 97), then PIN code can be 999999.
- **SEZ Supply** –

- In case of EXPWOP and SEZWOP, Passed IGST Value of Item will not be validated even if actual tax rate is passed, if the passed value of IGST for that is ZERO.)
- If the Recipient GSTIN is of type SEZ Unit or SEZ Developer, Supply type ('SupTyp') should be either 'SEZWP' or 'SEZWOP'. Other supply types are not allowed
- **State code and GSTIN validation** - First two digits of the Supplier / Recipient GSTIN should match with the state code passed in the Supplier / Recipient details accordingly except if supply type is SEZ or exports wherein Recipient state code will be 96.
- **PIN code validation** - PIN Codes are validated against the States, they belong by matching the complete pin code against state master. If the PIN Code does not exist in the master database of the e-invoicing system, and the first 3 digits of the PIN code is matched with the State as per the pattern of PIN code-to-State mapping defined by postal department, then IRN gets generated.
- **Transaction Type for E-Way Bill**
 - **Bill to Ship to** - If 'Shipping party' is provided, then the transaction is considered as 'Bill To-Ship To'.
 - **Bill from Dispatch from** - If 'Dispatching party' is provided, then the transaction is considered as 'Bill From – Dispatch From'.
 - **Combination of both** - If both Shipping and Dispatching parties are provided, then the transaction is considered as 'Combination of Both' (Bill From – Dispatch From and Bill To- Ship To).
- **Export Supply** - In case of export transactions for goods, the 'Ship-To' address should be of the place/port in India from where the goods are being exported.
- **IGST on intrastate supply** –
 - In case IGST on intrastate supply, tax rates and tax values related to IGST should be passed, and Supplier state code and POS state code should be same.
 - If IGST on Intra ('IgstOnIntra') value is set to 'Y', then Reverse Charge applicable ('RegRev') value should be 'Y'
- **Tax determination** - The state code of the Supplier GSTIN and POS will decide whether the supply type is Interstate or Intrastate. That is, if the State code of Supplier and POS is same, then it is intra-state, otherwise it is inter-state. *However, IGST on intrastate supply attribute will overrule this condition.*
- **Export & SEZ supply** - In case of Exports and SEZ, the supply is always Interstate
- **JSON size** - JSON payload size cannot exceed 2MB.

E) Item validations

- Serial number of the item is verified for duplicate values.
- **Goods related** –
 - Each item needs to have valid HSN code with at least 4 digits. That is, items of goods type should be 4 or 6 or 8 digits. HSN Code should be valid as per the GST master.
- **Services related** –
 - HSN code for items of service type should be 4 or 5 or 6 digits. HSN Code should be valid as per the GST master.
- **HSN Code Related** - Minimum 6 digits HSN codes for tax payers having turnover more than Rs. 5 Crore.
- **Services related** - If Is_Service is selected, then the HSN codes must belong to services.
- **Goods related** - Each item should have valid Unit Quantity Code (UQC) as per the master codes, in case of goods.
- **Goods related** - Quantity and Unit Quantity Code are mandatory for Goods and optional for Services
- **Tax rates related** - Tax rates are being validated. Only the allowed tax rates will be accepted
- **Tax rate related** - In case of intra-state transaction, the sum of SGST and CGST tax rates should be entered as GST Rate.
- **Tax rate related** - In case of inter-state transaction, the IGST tax rate and value has to be passed.
- **Tax rate related** - In case of export transaction, IGST tax rate and value has to be passed.

- **Tax rate related** - In case the Recipient is SEZ unit, then IGST tax rate and value has to be passed irrespective of state of the Recipient.
- **Maximum line items** - Maximum number of items in each invoice should not exceed more than 1000 items and a minimum of 1 item should be available.

TAX RATE

CGST	SGST	IGST	CESS(Advol)	CESS(Non-Advol)

AMENDMENT LISTS

Amendment No & Date	What has been changed
Amendment 7 Dated 17 th Jul 2024	1. Production and UAT URLs revised
Amendment 6 dated 14 th Jun 2021	1. Validation list updated 2. In Response new Field DocType Added.
Amendment 5 dated 12 th March 2021	3. Government API Vs Logitax API Differentiation added. 4. Request JSON Updated. 5. Response updated as per Request for multiple cases. 6. Validation list Updated. 7. Master Code list Updated 8. 2 integration options removed from documentation a. Without Template With Base 64 and without Serialization b. With Template With Serialization

Amendment 4 dated 30th November 2020	1. Changed the Sequence of the API Request Options. 2. Changes in the Request JSON and its Responses as per New Changes in JSON Schema 3. Changes made in the JSON Parameters like Addition of New Field, a. Addition: at Header Field ERPTType added which is optional and at valDtls fields Discount and OthChrg are added and are optional. b. Change: i. Changes in Mandatory Fields to Optional which are from Sr. No. H29 and K4. ii. Description for the fields added
--	--

	4. Added new Column in Request Schema named “Pattern” with details for respective applicable parameters/Field Names. 5. Validation List is Updated. 6. Changed Response Schema
Amendment 3 dated 10 th August 2020	1. Changes in the Request JSON and its Responses as per New Changes in JSON Schema 2.
