Update Transporter ID API

To access the API, application should first authenticate using the credentials shared. The API content information is used for authentication and authorization purpose.

We require JSON to be given through API. The format and details of updating Transporter ID for E-Way Bill API request is depicted in following table. We will take care of communicating with NIC and return with required response,

IMPORTANT NOTE –

Government has portal - <https://docs.ewaybillgst.gov.in/apidocs/index.html> where API specifications is given which includes JSON fields to be pushed to NIC.

Update Transporter For E-Way Bill [Sample JSON]:

Following details required to communicate,

URL	As per URL list
Content-Type	Json
Method	Post

Note: As per government JSON, Transporter ID will be updated for only single E-way Bill. However, we have handled it for multiple Documents/E-Way Bills in a single Json. Hence it has changed from object to an array (list). As a result, if you have only one E-Way Bill to which updating required even in that case, we request you to send data in array only.
